DESCRIPTORS: *Liquefied gases, Density, *Argon, *Methanes, *Nitrogen, Molecular association, Volume, Mathematical analysis, Solutions.

The densities of solutions of condensed gases Ar--CH_4 and N_2--CH_4 were measured. The volumes of these solutions were found to be nonadditive. A correlation was established between the excess volume of mixing, on the one hand, and the energy of mixing and compressibility of the solution, on the other. The experimental results were compared with theoretical values, satisfactory agreement being achieved. (Author)
